DETAILED ACTION

The following is a first action on the merits of application serial no. 10/069,879 filed July 25, 2002.

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 22-30 and 32-38 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. The claims 22-30 and 32-38 depend from cancelled claims.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 21, 31 and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by Korff et al. (DE04103685). Korff et al. discloses a process for attaching an oil sump to an engine block of a combustion engine, a seal being made by a curable composition (4) between a first sealing surface on the oil sump (2) and a second sealing surface (3) on the engine block, to which the curable composition is applied to one or both sealing surfaces, wherein when cured the curable composition demonstrates adhesion sufficient to secure the oil sump to the engine block, threaded bolts are not used as fastening elements and the oil sump is fixed to the engine block at least during the curing of the curable composition.

Allowable Subject Matter

Claims 22-30 and 32-38 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
